

AI Resume Evaluator & Job Matcher Web App

Revolutionizing Job Readiness with AI-Driven Insights

Team Details

Team Title : CodeCrafters

Team Members :

1. **Hari Kethan Bola**
2. **Charan Mancha**
3. **Jagadeesh Chalamcharla**
4. **Likhitha Ramya Mandala**

Problem Statement

- Job seekers often submit generic resumes to all job roles.
- Recruiters spend an average of 6–10 seconds scanning each resume.
- Candidates lack clarity about which roles fit their skillset.
- There is a gap between resume content and job description expectations.

Goal: Build a smart web app that gives personalized resume feedback and job role suggestions.

Proposed Solution

AI Resume Evaluator & Job Matcher Web App

- Users upload their resume (PDF).
- AI analyzes and scores the resume based on relevance, clarity, ATS-friendliness.
- Suggests skills to add/improve.
- Recommends job roles that match the resume.
- Option to apply or get improvement suggestions.

Tech Stack

Layer	Technology
Frontend	React.js, Tailwind CSS
Backend	Node.js, Express.js
AI/NLP	OpenAI GPT-4o, LangChain
Resume Parsing	Python (pdfminer, PyMuPDF)
Job Matching	NLP + Keyword Vectorization
Storage	Firebase / MongoDB
Hosting	Vercel / Render

Implementation Plan

Phase 1: Resume Upload + Parsing Module

Phase 2: Resume Scoring using AI prompt chains

Phase 3: Job Role Matching Engine using NLP

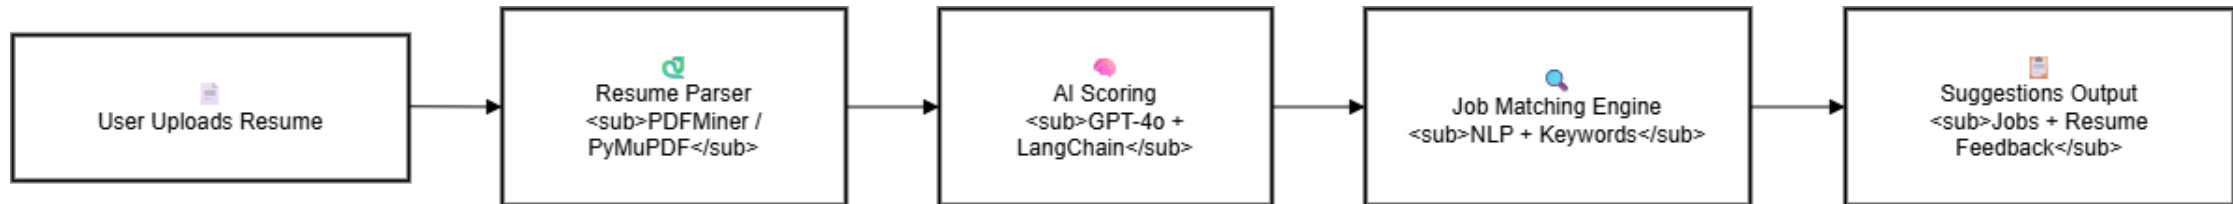

Phase 4: UI/UX Design and Integration

Phase 5: Testing, Feedback Loop, Deployment

Tools: GitHub, Figma, Postman, Render, Firebase Hosting

System Flow Diagram

AI-Powered Resume Evaluation & Job Matching Pipeline

Web App Preview & Live Demo

- Explore the live working version of the AI Resume Evaluator & Job Matcher web application.
- This prototype demonstrates real-time resume upload, AI-powered feedback, and job recommendations.
- Both frontend and backend codebases are publicly available.

 Live Demo: <https://ai-resume-evaluator-aaja.vercel.app/>

 GitHub Repository: <https://github.com/HariKethanBola/AIResumeEvaluator>

Features Demonstrated:

- Upload resume (PDF)
- AI scoring and feedback using GPT-4o
- NLP-powered job matching engine
- Clean, responsive UI with Tailwind CSS

Try it live and explore the code behind the innovation!

Future Scope & Innovation

- Support for regional language resumes (Telugu, Hindi, etc.)
- GitHub/GitLab integration for developer profile analysis
- AI Interview Coach module
- Real-time scraping of job boards for current openings
- Integration with government/NGO job platforms

Innovation:

- Combines resume feedback + job matching using AI
- Highly personalized and scalable
- Simple UI with powerful backend intelligence

Meet the Team & Social Impact

Team CodeCrafters:

- Hari Kethan Bola – Lead Frontend Developer & System Architecture Design
- Charan Mancha – Backend + Resume Parser
- Jagadeesh Chalamcharla – AI/NLP Integration
- Likhitha Ramya Mandala – UX Design + Testing

Social Impact:

- Helps students and freshers from Tier 2/3 cities
- Promotes awareness about job-market readiness
- Bridges gap between resume creation and real-world job expectations

THANK YOU!
